

Pete Verney

Managing the archaeology.

We agree to maintain those sites and keep them free of regenerating Sitka Spruce and any other invasive plants, i.e. bracken, gorse that might have a damaging effect on the remaining structures.

How many sites have you got?

In total we have over 100 sites, so they're scrutinised each year and I decide what work needs to be done and we get a local contractor in who does the necessary remedial work.

Do you have grazing on the site?

We do have grazing and to be honest on the newtake up at Lakehead we have maintained those sites purely by grazing, the animals manage to keep at bay any invasive Sitka or other plants that could conceivably damage the remains.
