

David Swales

The churchyard.

So the churchyard is still fully functional?

The churchyard is fully functional.

And maintenance, what does that entail?

Maintenance is the responsibility of the United Church, and we do try and get the grass cut during the summer, but its also quite a habitat for wildlife and flowers and there are some sixty odd different wild flowers in there, plus, I'm told, some very quite rare lichens on the wall, because of one of the joys of living 1,600 [1,400] feet above sea level the air is quite clear and so it produces these very beautiful lichens.
